

WIPPERMANN

SPIRIT

People, Environment, Technology

# People

**Our employees are our greatest asset and many of them have been linked to the company for several generations – this is how we build future prospects.**

As a family-run business, we focus on long-term perspectives, with future generations in mind. We therefore attach great importance to training and qualification opportunities as well as a comprehensive health and safety management. Indeed, we have been well and truly exceeding legal standards since the 1970s. We work together to ensure that Wippermann remains an employer with attractive perspectives for the future.

Further information is available at [www.wippermann.com/people](http://www.wippermann.com/people)

# Environment

The environment is a key consideration for our technical innovations – we base our solutions on sustainability.

Our specialised production experts continuously generate new ideas, which we adopt with the long-term protection of the environment in mind. We are therefore permanently enhancing our production processes and saving or recycling energy, reducing emissions and ensuring that waste gets reused. When developing our products, we focus on constantly optimising material and reducing lubricants. We therefore never lose sight of sustainability issues when establishing our business goals.

Further information is available at [www.wippermann.com/environment](http://www.wippermann.com/environment)

# Technology

We consider products optimal if they comply with our strict quality and environment standards and the high expectations of our customers.

Our engineering department is constantly elaborating new ideas through research and development for improving our industrial chains and sprockets. Wippermann always comes up with an appropriate solution for perfectly coordinated drive systems: from competent application consulting to the planning and processing of customised products using state-of-the-art production equipment. Based on our 120 years of competence, our innovative drive concepts never fail to impress customers.

# Chains

High-end chains from Wippermann meet our customers' most demanding requirements for smooth production processes.

Our broad range of high quality, low maintenance and maintenance-free industrial chains comprises roller chains, leaf chains, accumulator chains, hollow pin chains and bush chains. We also produce customized special chains. A stringent selection of appropriate raw materials by regional experts, competence in semi-finished parts production and sophisticated heat treatment and coating processes ensure our proven Wippermann quality standards at all times.

Further information is available at [www.wippermann.com/industrial-chains](http://www.wippermann.com/industrial-chains)

# Sprockets

**Our high precision sprocket production is based on the latest technology – this is how we implement our individual standards quickly and accurately.**

We use the most modern of CNC automatic lathes and milling centres to produce our sprockets and plate sprockets from carbon steel, stainless steel and special materials. With the greatest accuracy and proven quality, we manufacture any tooth design required.

In addition to hardened tothing, we also provide surface-finished designs. We are thus able to guarantee our sprocket-chain systems with perfectly matched and aligned components in order to always achieve optimal functionalities and high durability.

Further information is available at [www.wippermann.com/sprockets](http://www.wippermann.com/sprockets)

## Product and performance range

- Roller chains
- Roller chains with attachments
- Leaf chains
- Biathlon chains
- Marathon chains
- Triathlon chains
- Accumulator chains
- Pusher dog chains
- Special chains
- Side bow chains
- Double pitch roller chains
- Hollow pin chains
- Roller chains (works standard)
- Bush chains
- Top plate conveyor chains
- ATC chains
- Inverted tooth chains
- Sprockets for all types of chains
- Plate sprockets
- Chain couplings
- Special sprockets
- Lantern gear sprockets
- SPR sprockets
- Lubricants also available as a spray
- AFS, POM and TPU clips
- Chain tensioners and chain breakers
- Chain pullers, clamping bushes
- Guide rails
